

Wood Burner Questionnaire

Applicant's Name, Address, City, State & Zip _____

Agent Name _____

Policy #, if not a new application: _____

Agent Code: _____

Property Location, if different from above: _____

Manufacturer: _____ Year Built or Estimated Age: _____

Style: _____

What year was unit installed? _____

By whom? _____ If other, please describe: _____

Installation inspected by: _____

If other, please explain: _____

Are there any special features about the heating unit or the total installation? _____

Does pad extend 18" beyond the ash door? Yes No Number of Inches: _____

How are ashes disposed of? _____

USE

The unit is: _____

Is the unit operated on a regular basis without someone in attendance? Yes No

Smoke Detector? Yes No If yes, type & how many: _____

Fire Extinguishers? Yes No If yes, type & how many: _____

What type of wood is used: _____

What is the consistency of the wood? _____

PROXIMITY INFORMATION

A) Walls

Is the surface: _____

What is the clearance in inches to the unit? _____

If surface is combustible, any protective material present? _____

If other, please describe: _____

B) Ceiling

Is the surface: _____

What is the clearance in inches to the unit? _____

If surface is combustible, any protective material present? _____

If other, please describe: _____

PROXIMITY INFORMATION (CONTINUED)

C) Floor

Is the surface: _____

What is the clearance in inches to the unit? _____

If surface is combustible, any protective material present? _____

If other, please describe: _____

CHIMNEY CONSTRUCTION

1) Where is chimney located? _____

2) What is the construction of the chimney? _____

3) If metal: _____

4) Is chimney flue lined? Yes No

5) Is more than one heating unit connected to this flue? Yes No

6) If yes, describe the other unit and the connection: _____

7) How often is chimney cleaned and inspected? _____

CONNECTOR PIPE

1) What kind of pipe is used between heating unit and chimney? _____

2) Is the total length of the pipe less than 10 feet? Yes No

3) If more than 10 feet, state the actual length: _____

a) Is each joint fastened with metal screws or other approved fasteners? Yes No

b) Is the horizontal pipe supported? Yes No If yes, how? _____

c) If the pipe runs horizontally, is the clearance to the ceiling at least 18 inches? Yes No

d) If not, is there a heat shield of asbestos millboard or sheet metal 1" from ceiling? Yes No

e) What is the distance of the pipe from the ceiling? _____

f) What is the distance of the pipe from the wall? _____

4) Does the stovepipe enter the chimney in the same room as the heating unit? Yes No

5) If pipe runs through a partition or ceiling, is a ventilated thimble 3x the pipe diameter used? Yes No

6) Pipe to chimney connection: please check the type and answer the questions.

Ventilated metal thimble Is the diameter 3x pipe size? Yes No

Metal or fire clay thimble Is it surrounded by at least 12" of fireproof material? Yes No

7) Is there at least 18" between pipe and any combustible material? Yes No

If yes, what materials are within 18" of pipe? _____

8) How often is pipe dismantled, cleaned and inspected? _____ By whom? _____

RECOMMENDATIONS
